

Flight Information Sheet

- The flying season is from May-October. Specific dates are arranged based on the pilot's availability, and happen approximately one to two times a month, often on weekends.
- All of our aircraft are for only one passenger plus the pilot.
- Minimum age requirement is 12 years old. Waiver must be reviewed and signed by a parent or guardian.
- The flight experience is approximately 60 minutes, which included a briefing with the pilot before the flight. Time in the air is approximately 20-25 minutes.
- All flights are dependent on weather and availability of the pilot. Decisions on weather will be made the day of the flight. If travelling from a distance the day of, please reach out to us to arrange communication with the pilot directly. We would like to make sure to save you a trip if the weather looks poor all day. Finding a second date will be dependent on the pilot's availability. Typically this can not happen the same weekend as our pilots are not local and must juggle travel and work commitments along with volunteering for the museum, but we will do our best to find a solution.
- All of our aircraft require a climb in to the cockpit, so the passenger must have fairly good mobility. Please reach out to us if you have concerns.
- Payment will be taken immediately before the flight for the cost of the flight plus a \$30 museum membership. (The passenger must be member of the museum in order to have a flight.) We accept credit card, debit, cheque or cash. There are no additional fees.
- Please arrive at the museum 30 minutes before your scheduled flight as we have some paperwork for you to fill out and then will process your payment. You and one other member of your party will not be charged admission to the museum, however any more than two attending will be required to pay admission. After your paperwork is complete, you are welcome to enjoy the museum until the pilot is ready for you.
- Weight restrictions are as follows:
 - Fleet Finch - 200lbs max
 - Stearman – 240 lbs max
 - Harvard – 300 lbs max
 - Tight Moth – 200 lbs max
